The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-11 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 requires a golf ball having two outer layers. It is not understood how both layers can be "outer" layers. It appears from the specification that one layer is intended to be beneath the other. "Outer" cannot be defined as being "inner" or "outer". The two are self-contradictory.

There is no antecedent basis for "(8)" in claim 11.

JP2002336378 shows applicant's polyurethane/isocyanate/thermoplastic layer, but lacks the ionomer layer. Takesue 2002/0099120 (table 4) shows a ionomer/thermoplastic/fatty acid/metal ion layer beneath a polyurethane outer cover. Takesue lacks the functional compound (g) in that layer and the isocyanate (b1)/thermoplastic (b2) in the polyurethane layer. Applicant has shown (table 1) the presence of (g) improves adhesion between the layers. Herbert suggests alternative methods (eg plasma or corona treating) for improving adhesion between ionomer layers and polyurethane layers.
